

information services

the best decisions are made by those best informed
be a better decision maker

ERA's Information Team has many years of experience in providing information to companies of all sizes, in a diverse range of industrial sectors. By researching the best, quality assured sources, our expert information scientists can save you valuable time and money.

product development

- Improve your products using existing technologies
- Monitor the competition
- Gather market intelligence.

innovation support

- Be aware of emerging developments in your market place
- Maintain awareness of new technologies, processes and capabilities
- Review patent activity.

business risk management

- Precise information can mitigate the risk of losing market share
- Use competitive intelligence to spot developing trends
- Determine suppliers financial stability
- Ensure customers are capable of paying bills.

regulatory compliance

- Demonstrating product compliance is a critical factor for all companies
- Keep your standards up-to-date
- Monitor legislation
- Access world markets' regulatory requirements.

how to access the service you need

The process is simple.

We discuss your requirements with you, advise on how we intend to proceed with the job and what the outcome is likely to be. Our service is designed to be low risk and highly flexible. We can carry out small specialist *ad hoc* tasks or large complex projects.

We offer a prepaid option for companies who need a fully outsourced enquiry service, no paperwork is needed at the time of the enquiry. Simply pick up the phone or send us an e-mail and we will answer the enquiry no matter what the subject or the complexity.

For those customers who require high value, one off research projects we will put together an individual proposal for that one piece of work, based on an hourly rate and any additional costs, such as online time and document acquisition.
