

The gateway to ERA Technology's corporate knowledge

Authoritative, reliable information improves the success rate in decision making, giving companies a sharper, more competitive edge. ERA Technology has a comprehensive information and library service designed to save clients valuable time, providing fast responses to their information needs.

ERA Technology's information professionals use quality assured sources to answer questions such as:

- Am I reinventing the wheel?
- Where should we market this new product?
- Will this new customer pay his/her bills?
- Are our competitors moving in this direction?
- What standards apply in this country/subject area
- Has anyone solved this problem already?
- What is the economic climate like in this new market?
- Who can supply...?
- Where can I find a book on?

Commercial databases

Dun and Bradstreet and Companies House provide company financial and credit information. We also have access to supplier details and market research.

Technical databases

Inspec, Compendex, Metadex, and Derwent World Patent Index and Chemabs databases give access to millions of journal articles, conference proceedings, books and theses covering the last 40 years.

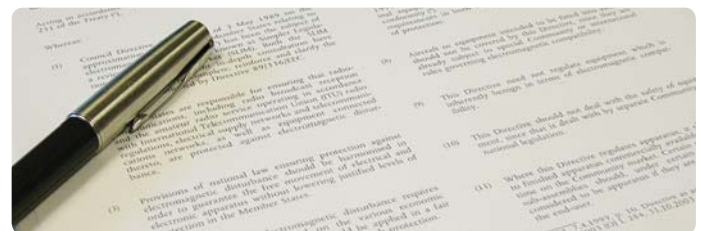

Library

Borrow books and copies of articles.

Standards

Access to British and overseas standards, information on equivalent standards, currency checking and subject searching.
