training courses.

REPORTS AND PUBLICATIONS

Authoritative technical
reports and standards
newsletters.

Enhance your technical resources with AccessERA

AccessERA

Subscribe to AccessERA and benefit from world-class expertise.

Experience the positive impact of AccessERA, the key to increasing your engineering capabilities.

Be part of AccessERA and discover the route to successfully meeting strategic technical objectives eg. improve quality, adjust to technological changes, comply with legal requirements and excel in innovation, productivity and performance.

How AccessERA works

A company subscription to AccessERA gives you the opportunity to use ERA Technology as your complementary virtual engineering team, allowing you to dip into vast technical and information resources whenever you need them.

AccessERA allows you to extend your engineering capabilities with the experience of over 100 technical experts at ERA Technology Ltd.

Technology-based markets are highly demanding and supplier companies competing in those sectors have to get the flow-through of innovation into products to drive competitive advantage.

This is not an easy thing to achieve; it requires excellence in developing new technologies, the integration of complex systems and advanced knowledge of world-wide standards and product legislation.

If you aim to secure the best products to win business, then AccessERA is the route for you. It provides fast access to expert advice about leading-edge technologies, authoritative information services to keep you up-to-date with worldwide standards and, most importantly, keeps you ahead of the competition.

An AccessERA subscription is for one year and includes a set amount of 'credits' that can be used in exchange for services such as consultancy, testing, analysis, engineering training and publication sales. Your subscription also includes access to a comprehensive Information Centre, copies of our popular 'Safety and EMC', 'RE⁴view' and 'Standards Alert' newsletters as well as online access to the password protected AccessERA Subscribers Extranet and e-newsletter 'Legislation Alert'.

Flexible credits

Once your AccessERA subscription is in place, there is no further paperwork involved. The benefits are designed to be flexible to suit your specific technical requirements. All 'credit' usage is agreed with one main contact at your organisation.

What our customers say about AccessERA

RS Components Ltd - "Having instant access to a wide range of proven engineering consultants is one of the key benefits of our subscription"

Horiba Instruments Ltd - "One of the main benefits of our subscription is having access to such good sources of information including updates to changes in directives and standards"
